Education

Lahore Leads University, Lahore, Sep 2022 – April 2026

Bachelor of Science in Computer Science | CGPA: 3.1

Garrison College, Lahore,

Intermediate in Computer Science | Grade: A

Work Experience

INOTEXEL, Lahore April 2026 – Present

Associate Mobile App Developer

- Spearheaded the development of the corporate SaaS mobile platform to optimize performance and increase user retention by 25%.
- Engineered the 'IQPrompt' AI-based mobile interface from scratch, ensuring clean information architecture and seamless user journey.
- Orchestrated mobile app development for international clients (US/UK), translating complex requirements into high-quality React Native solutions.

IT EXTENSION, Lahore Oct 2024 – April 2026

Mobile App Developer (1.5 Years)

- Developed a cross-platform mobile application for table sports venue management, streamlining booking and operational workflows using React Native.
- Developed a dual-interface school transport app for parents and drivers, prioritizing accessibility and real-time coordination.
- Built a mobile healthcare application in React Native, resolving critical mismatches between designs and frontend capabilities.

Projects

Aeonian Technologies – School Transport App (Driver & Parent Interface)

- Engineered a dual-interface cross-platform school transport app to facilitate seamless coordination between drivers and parents.
- Developed role-based dashboards and real-time ride tracking in React Native, improving safety protocols and streamlining navigation for diverse user groups.

B2B / B2C Venue Management System

- Architected a scalable mobile app supporting both business owners (B2B) and customers (B2C) for venue and booking management.
- Created streamlined booking and slot management flows, optimizing operational efficiency, customer experience, and scalability.

MINIMI Healthcare Platform

- Developed a multi-role healthcare mobile app with role-based dashboards (Caregiver, Family, Patient), standardizing components to enhance communication and service efficiency.

CUIDAAPR – Healthcare App (Patient & Caregiver)

- Built a bilingual React Native healthcare app connecting patients in Puerto Rico with verified home health aides.
- Implemented user profiles, caregiver search, a booking system, ATH Móvil payment integration, and real-time care request management.

Aeon App – School Ride Tracking

- Developed a cross-platform mobile app for families and drivers to track daily school rides, manage schedules, and receive real-time updates.
- Built role-based features for Parents and Drivers including live ride status, route planning, and student pickup management.

IQPrompt

- Developed the end-to-end mobile UI of a SaaS-based AI platform, applying a user-centered approach from research to high-fidelity implementation.
- Refined accessibility and consistency for efficient prompt management across mobile screens.

Balochistan e-Wallet App

- Developed a government-funded fintech mobile application to boost financial accessibility across diverse user groups.
- Implemented intuitive navigation and transaction flows, ensuring usability for users with varying digital literacy levels.
